

MORPHOWAVE™

TAKE A STEP BEYOND TOUCH

_Fingerprints Acquired

MorphoWave™ is a contactless fingerprint acquisition solution. This innovative device captures four finger images with a single movement in less than a second. Its dynamic acquisition capability allows subjects to be 'on the move' during fingerprint capture. MorphoWave™ is well suited for high traffic environments.

- **Advanced touchless technology**
- **Very high throughput and performance**
- **Compatible with current contact databases**
- **Meets the challenge of dry and wet fingers**

MORPHOWAVE™

TAKE A STEP BEYOND TOUCH

MorphoWave™ provides a comprehensive solution for the challenges faced by traditional finger scanning systems. A major breakthrough for fingerprint acquisition, the device vastly reduces capture time - under 1 second - resulting in greater efficiency and a better end user experience. It also provides fingerprint images compatible with current contact fingerprint databases.

APPLICATIONS

Border control

Flow management

Sensitive sites

Biometric document issuance

KEY FEATURES

Ease of use

- Captures four fingerprints in one movement
- Acquisition in less than one second

Acquisition quality

- Meets the challenge of dry and wet fingers
- Touchless capture : no ghost images left on the scanner

Benefits

- Mitigates hygiene and cultural concerns
- Reduces bottlenecks in high traffic areas
- Compatible with standard flat & rolled fingerprint databases for both verification & identification

Security

- High accuracy
- Robust against external light and dust

TECHNICAL INFORMATION

- **Dimensions (W*H*D)** : 133 x 350 x 341mm (5.23'x13.78'x 13.42')
- **Weight**: 3,5kg (7.7lb)
- **Power**: 100 – 240V (50 – 60Hz)
- **Interface**: PC/laptop through USB 3.0
- **Intended for indoor use**
- **Standards** : IEC60950-1, EN60950-1, UL60950-1
